

# Adir Evgi

Passionate about cyber security, paving my path by studying and acquiring skills online with courses at "TCM Security" and "Pentester Academy" To gain insight on attacks and have the attacker's set-of mind, planning to enroll in more certifications and courses

Practice and learn from other researcher's publications by performing best effort self exploration from the publication and writing a small informational cover on that experience. Enjoy training on "Capture The Flag" platforms ("TryHackMe", "Hack The Box").

The cyber defensive world is my goal, never stop, never give up by using coffee as fuel, and working harder to accomplish my dreams.

---

## Skills

- Strong analytical, problem-solving, and critical thinking skills.
- Ability to work in time-sensitive and stressful situations.
- Programming in Python.
- Fundamental knowledge of Host and Network Forensics.
- Familiar with Computer security incident investigation and response.
- knowledge of network architecture and protocols (TCP, UDP, HTTP, DNS).
- Intermediate knowledge of analysis tools, attack analysis tools, attack frameworks, and vulnerability scanners (Nmap, Wireshark, Burpsuite).
- Basic experience with malware classification and scoring systems of security threats.
- Ability to excel in a face-paced, challenging, operating environment with 24/7 shifts
- Natural curiosity and ability to learn new skills quickly.

---

## Language Competencies

- Hebrew: native language.
- English: reading, writing, speaking
