WORK EXPERIENCE

SOFTWARE TEAM LEADER

Taranis | July 2019 - present

- Manage a team of four developers
- Analyze user needs and design software solutions
- Code high-performance programs using different frameworks
- Create and implement company procedures for writing "clean code" to ensure all of R&D is aligned
- Coordinate with the product team to build and execute new features
- Host weekly team meetings to check on progress, provide guidance, implement goals, and create strategies to support the team in reaching milestones
- Hire and train front-end and full stack developers

FULL STACK DEVELOPER

Taranis | 2017 - June 2019

- Designed and developed a web application that monitors crop diseases in order to help farmers make better decisions when managing their fields
- Involved in the scrum end-to-end development cycle with a focus on creating a high standard web app
- Developed in React framework using ES6, HTML5 with CSS3 by LESS and used Google maps API with Leaflet and WebGL
- Developed in C#, Python, Nodejs using Kubernetes micro services and Google Cloud data store

SOFTWARE ENGINEER

AreaOne | 2013 - 2016

- Developed on both server and client sides of a SaaS platform used by advertising agencies, integrated with Facebook using Graph and Ads APIs
- Utilized Java with Spring and Hibernate, HTML5 with CSS3
- JavaScript MVC, jQuery and Bootstrap using MySQL
- Worked with tight schedules and weekly release cycles
- Maintained systems and was responsible for client support
