Objective

Passionate about computer engineering, embedded, and software.

Computer Languages and Systems

Java, Python, C, C++, Assembler, PHP, JSP, HTML, JavaScript, MySQL, Node.js, Matlab.

Experience

July 2017 – September 2017

Push Startups – Part-time Programmer and Team Manager.

Fixed and Developed part of a website that ran with Google Services (Google Code, Google Sheets, Gmail etc.). Later on managed a team converting the site fully into PHP. The job required quick independent learning to fill in for the single programmer in the office that left the company.

July 2012

Tsemed – Summer Intern.

Fixed website in PHP and HTML. Also helped in mobile development in Java (mostly for Android, and some Blackberry), which required quick independent learning on the job.

October 2010 – June 2012

Private Tutor

Tutored high school students for the 5 point computer bagrut, and junior high students in math.

Education

Microsoft Azure Courses (September 2022)

- AZ-900: Microsoft Azure Fundamentals (8 hours)
- AZ-104: Microsoft Azure Administrator (32 hours)
- AZ-500: Microsoft Azure Security Technologies (32 hours)

Computer Engineering at Bar Ilan University (2017-2022)

- Has his bachelor's degree in Computer Engineering at Bar Ilan University.
- Learned software related courses such as OOP, Data Structures and Algorithms, Software Engineering, Machine Learning etc.
- Learned programming languages as part of the software courses studied such as C, C++, Python, Java, Assembler, Node.js.
- Learned hardware related courses such as Logic Design, CPU and Microprocessors related courses, VLSI, and more.

Shaalei Torah High School (2009-2012)

- Completed the 5 point bagrut in computer science in Java with a final grade of 97. The bagrut included OOP and creating a website in JSP with HTML, JavaScript and MySQL.
- Studied 5 points math and physics.

Army Service

2012 – 2017

Served as a gunner in the Tank Corps, as part of the Hesder program at the Otniel Yeshiva.
