-

Work Experience

2019 – now **OPERATIVE** | Scrum Master

Development of operating system for advertising in both television and digital media using micro services architecture. Scrum master in a team of 4 developers. Splitting tickets, planning sprints and take responsibility for the team work. Planning architecture and solving any issue in both server and client with focus on clean code and SOLID principles.

2017 – 2019 **MIGDAL TECHNOLOGIES**

Development of insurance process, including – health and pension claims.
 Planning and implementing robust SOA application using REST architecture and SOLID principles.
 Wrote a Java based server with Angular client with emphasis on optimizations.
 Designed and implemented tests as part of all project flows.

2015 – 2017 **I-ROX**

Lead two defence industry projects for Elbit and Cyberbit.
 The latter entailed the development of command and control interfaces for foreign armies.
 The former focused on creating an interface for a data mining tool from various data sources (covert and non covert)
 I am unable to go into further details due to security restrictions.
