RELEVANT EXPERIENCE

WhoKnows • Mobile & Full Stack Software Developer

A startup for sharing social data between friends

[Google Play](#) • [App Store](#)

Jan 2020 - Present

A React Native Mobile iOS & Android app that lets you know the professionals your friends recommend in the field you need, consult with friends about them, and share your recommendations with your friends.

A Production Ready system that has been operating for a while in MVP mode, and is now growing.

My Job:

- Writing the app in react-native from scratch
- Implementing new screens & functionality
- Uploading the application to Google Play and App Store
- Implementation of tools such as bugsnag, Logtail & more
- Designing and writing the server code in node.js
- Designing and implementing the MongoDB server

Technologies: React Native, TypeScript, Redux, Node.js, Express, mongoose, MongoDB
