

# NOAM AVNER

• Full Stack Developer •

## ABOUT ME

Hardworking full stack developer, energetic, and self-learning. Ready to contribute to a productive work environment. I am highly driven and creative, passionate about software and cloud computing. Seeking a full-time position as a developer.

## WORK EXPERIENCE

2020 - Present

### Full Stack Developer at Pick A Pier

Pick a Pier utilizes technology to design innovative solutions for marinas and boaters around the globe.

- Experience in front-end development for two web applications, using ReactJS.
- Developing using NodeJS to build back-end services and API.
- Working and maintaining AWS and Firebase services.
- Maintaining and working with PostgreSQL Server.
- Led a migration project from Javascript to Typescript.
- Assisting the data science team by creating scraping scripts, building models, and validating incoming data.
- Responsible for creating scripts for newcomers to help them set up their environments faster.

## EDUCATION

2018 - Present

### Computer Science (B.Sc.) at IDC Herzliya - Reichman University (GPA: 84)

#### Notable Courses:
