

ABOUT ME

An experienced software developer specializing in end-to-end programming, seeking a backend development position. A team player who loves working through and implementing tricky algorithmic problems. Self-motivated, willing to put in extra work. A creative thinker who is always aspiring for excellence.

EXPERIENCE

Software Developer | Elbit Systems | 2021 – Current

- Currently working as part of a team responsible for a communication networking system, mainly focused on Network layer (L3).
- Developing various capabilities and features in a multithreaded Go environment.
- Using Docker for configuring, setting up and deploying in a multiservice environment.
- Point of contact for a peer team.
- Converted a C++ library to a Go package.
- Added features to the web testing tool application, which was written in JavaScript using React + Redux on the frontend and Node.js on the backend.

Full stack web developer | P.T.C | 2019 – 2020

- Developed end to end features in two web applications. The projects were implemented with the following technologies: TypeScript, Angular 8, Java (with Spring), React + Redux, Node.js, Liquibase (SQL), and Zuora.
- Converted a plain JavaScript codebase to Angular TypeScript.
- Wrote both unit and integration tests to ensure code quality and functionality.

EDUCATION

Embedded Bootcamp | Infiniti Labs | 2021

B.Sc Computer Science | Bar Ilan University | 2016 – 2019

Average: 86

High School | Ulpenat Orot Modiin | 2007 – 2012

Five Units in Math, Computer Science and English.

NATIONAL SERVICE

First year | 2013

Counsellor in an afternoon program (Kadima Pardess Katz), helped children with their homework.

Second year | 2014

Community Volunteering, Yavne, Private tutoring for children in the 'Ben Gurion' primary school.
