## SUMMARY

---

**Full-Stack Web Developer, Tech Lead and former Team Leader**, experienced in working and leading a team of developers and QA staff in building very complex, future proof and dynamic projects:

- **Design and Implement a Microservices based architecture.** In my current role as Tech Lead, I was in charge of designing and implementing a microservices based architecture with **.Net 5 based Docker** containers hosted on an On-Premise **Kubernetes** cluster. Design included, among other things, a token-based Authentication system, meeting the strict security requirements of a defense industry company. Also built the **Vue.js** infrastructure components and authentication code for Vue based SPA templates.
- **Cloud based (Azure) Video Delivery Application** serving thousands of clients across the country. Integrations with **Elastic Search, Azure Search Tables, and various other 3<sup>rd</sup> party platforms**
- **Backend RESTful APIs** for client applications.
- Proficient in **.Net 5 and .Net Framework** backend development. Frontend technologies I use include **Vue, React, vanilla JS (ES6), HTML, CSS (+SASS)**. Some Experience with **Node.js & Express, Angular 2+**.

Very responsible with **excellent research and self-learning** skills.

## SKILLS

---

- Autodidactic, fast learner.
