

Beatriz Nudelman – Electronic Engineer

E-mail: beatriznudelman95@gmail.com

LinkedIn: <https://www.linkedin.com/in/beatriz-nudelman-976712b6/>

Summary:

- **B.sc Electrical and Electronic Engineer**, dynamic, communicative, oriented towards interdisciplinary group work, flexible, organized, competent, agile and easy to learn in **new technologies**, with great capacity for dialogue with the general public.
- Focus on **innovation** as improvement to get better **results efficiently**
- Customer service experience

Education:

2014 - 2019 – **B.sc Electrical and Electronic Engineering**, Faculty of Engineering São Paulo (FESP), Brazil
2009 - 2013 - **Electronics Technician**: Osasco Technological Institute, Brazil

Professional Experience:

 **2019 – 2020** **Electronic Engineer Trainee - Georg Fischer LTDA, Brazil**
Global supplier of plastic and metal pipe systems

- Experience with **Customer Service Support** in Brazil
- **Training with industrial products and solution** developed by the Georg Fisher for industry and infrastructure, including solutions for processing chemicals, energy shipbuilding, water, and sewage treatment.
- Experience with each type of welding and machine models that the company sells, including welding tools and procedures (**welds like TOPO, socket welding, electrofusion, infrared welding**).
- Experience with to keep updated the catalogs of welding equipment, **sensors and instruments for measurement** physical and chemical quantities, such as, **conductivity, PH, ORP, Salinity, Oxygen and Chlorine** dissolved in water and turbidity.
- Experience with prepare our presentation in a **WORKSHOP** to demonstrate GF products.
- **Technical visit** to the company COMGÁS - Companhia de Gás de São Paulo.

 **2014 – 2015** **1° Level Telecom Support Analyst. / British Telecommunication, Brazil**
British telecommunications company

- Fair knowledge in network protocols such as: **Frame-relay, ATM, and IP**.
- Management and support in **satellite links**: Hughes, GILAT, Viasat, IDIRECT, SCPC and Sky performer.
- Troubleshooting and configuration on Cisco routers.
- Datacenter/teleport systems operation and management. **RF equipment, LAN and WAN** networks.
- **Customer and field services support**.

 **2012 – 2013** **Electronic technician Trainee / Procomp Electronic Industry**
Computer software company

- Experience with **quality control and inspection of mechanical and electronic parts** based on ISO-9001 Standards.
- Technical drawings analysis. Inspection of parts with the aid of callipers, micrometres, squares and other tools to evaluator whether the analyzed parts were in accordance with its design in order to approve or reject it by quality control.
- Preparation of technical reports to specify the reason for rejection of the equipment.
- Mounting and dismounting of ATM modules.

Additional Courses:

- Advanced PC hardware. (Procomp)
- Physical and mechanical structures focused on polymers (GF)
- Design Thinking applied to innovative customer-focused solutions (GF)

Languages:

English - Fluent; **Portuguese** - Fluent (Native); **Hebrew** - Basic
