~

Work Experience:

2018 Oct – Present: Herolo - Web developer

I develop the frontend side of two web-apps for some of the biggest companies in the Israeli market. The projects have large codebase, big annual usage and a strict demand for quality testing.

Stack: Angular 6, Redux, RxJS, Jest, TypeScript, HTML5, SCSS

2018 Jan – 2018 Aug: LifePlus - Full stack developer

Building the control web server and interface of an elderly aimed smart watch

Worked with Angular4 framework , NodeJS and PostgreSQL

Libraries: InversifyJS, Angular Material, Chai (Unit testing)

Education:

2013 - 2017: B.Sc in Computer Science, The Hebrew University of Jerusalem, Israel

Favorite Subjects: web technologies, image processing and databases

Programming Skills:

- Languages: *TypeScript\JavaScript (1.5 years), Java, C\C++, Matlab, SQL*
- Experience with:
 - Full Stack development: Node.JS, Express.JS, PostGRES SQL, RxJS
 - Object oriented programming and databases programming

Personal Projects:

2015: HackIDC Hackathon

Designed and programmed a smart shopping solution using a non-GPS based navigation. The project included an application for Android, an Arduino, and NFC tags.

Military Service:

2010 – 2012: Air and land forces coordinator, the Israeli Defense Forces

- Operating in a high-pressure environment
- Working individually and as part of a team

Languages:

- Hebrew: At mother tongue level
- English: Excellent
