Experience

Diagnostic Robotics Ltd., Tel Aviv - Full-Stack Web Developer

2019 - 2020

- Owner of maintenance, development and release of two client-facing web apps and two back-office web apps
 - Main app is a questionnaire with dynamic flows and call-to-actions based on user responses and customer requirements.
 - Tech-stack: **Python, ReactJS, Redux, MySQL, Redis, Elastic, Docker, k8s, GCP, Bitbucket**
- Led the rewriting of a client-facing web app in ReactJS from scratch, employing Redux and Redux-Saga to create manageable, extensible and declarative support for dynamic user flows, eventually allowing to support over 8 unique customer flows with the same codebase
- Owner of end-to-end search experience, including the introduction of Elasticsearch and related infra to the system and their integration into an existing micro-service architecture
- Drove the introduction of new cloud hosting infrastructure on GCP to leverage Google's CDN capabilities
- Drove the introduction of an interactive 3D model with animations and gestures using 3js library
- Experience in monitoring, mitigating and resolving production bugs with **Splunk** and **PagerDuty**

IDF — Full-Stack Web Developer

2013 - 2018

- Owner of multiple web applications end-to-end, with data aggregations and master-detail graphs/gauges
 - Tech-stack: **AngularJS, JavaScript, Typescript, CSS3, HTML5, jQuery, D3.js, Java, Activator, Spark, PostgreSQL, Oracle 11g Database, Spotfire based on SQL queries and IronPython**
- Drove solutions to core problems, like saving and loading page states in AngularJS while being agnostic to the present components, or enabling version control and zero-downtime deployments of data report queries to Spotfire
- Committed to 24/7 support and maintenance of critical operational services
- Closely collaborated with UX designers and PMs for better understanding of user needs
- Owner of a WinForms (C#) dashboard desktop application, with data aggregations and graphs
 - Owner of external interfaces - send, parse and process incoming data to be aggregated and displayed in the dashboard
 - Owner of code integration and collaboration with 3rd Party company (Ness TSG)

Education

Mamram (IDF) - Software Development Course (2012-2013)

HackerU, IDF, John Bryce - Practical Engineer (2013-2018)

- **ReactJS (HackerU); Design Patterns, AngularJS (IDF); ASP.NET 3.5, Extreme .NET 4/4.5 with C#, Cyber Warfare (John Bryce)**
