PROFILE

Experienced and innovative Network Engineer seeking to become an integral part of a company. Committed to working collaboratively with other team members but also individually. Very responsible and dedicated, I strive for excellence.

EMPLOYMENT HISTORY

Build and Release Engineer at Intel , Jerusalem

2020 — 2020

- Ran builds, learning different scripts and dispatch through Azure DevOps.
- In charge of the release process for Firmware versions.
- Adjusted Firmware according to the relevant requirements of each client.
- Implemented code builds and automated deployment procedures.
- Resolved system issues and inconsistencies in coordination with quality assurance and engineering teams.
- Outlined build and deployment procedures in consultation with developers.
- Examined and executed application-specific deployment processes.
- Resolved system issues and inconsistencies in coordination with quality assurance.

Technician & Project Manager at IDF- MAMARAM UNIT , Ramat Gan

July 2017 — June 2019

- Dealt with the axis of construction, ensuring systems were operating as required and determining when they were no longer useful.
- Managed the daily activities of local and wide area network systems.
- Installed and tested network servers.
- Tested, documented, and maintained all network components.
- Managed and coordinated the installation of new data services.
- Standout performance was recognized by elite leadership, culminating in assignment to increasingly difficult projects.
- Obtained permission for a project including the architecture, servers, and logistics.
- Worked as a thoughtful and cooperative team member.

EDUCATION

Open University
