Hard Working

Tamir Geron

Full Stack /Frontend Developer with experience on personal projects, graduated from Coding-Academy Bootcamp. B.Sc in mechanical engineering. Very passionate about innovation and software development. Fast and self-taught, I am detail-oriented and have excellent teamwork skills. Check out my latest project for examples of my work.

Personal Projects

Sunday

Sunday is a platform for managing tasks and projects, inspired by the "Monday" website. It uses React, SCSS, NodeJS and JavaScript.

<https://sundaycoding.herokuapp.com>

Education

Full Stack Developer

2022

Coding Academy

The Bootcamp program consists of twelve weeks of daily and intensive study. My studies during the Bootcamp included Javascript, HTML, CSS, GIT, JQuery, AJAX, React, and Node.js.

My skills include working with servers and host configurations, performing database integrations, and creating dynamic, data-driven websites. I developed many projects during the Bootcamp, some of which are available in my GIT repository.

Final Project: Website based on Monday <https://sundaycoding.herokuapp.com>

B.Sc degree - Mechanical Engineer

2017 - 2021

Sami-Shamoon Collage

Researched, designed, and developed mechanical systems. Robotics study.

GPA: 86.

Relevant courses: MatLab, Computer Programming, Micro-Controller

Final project: Smart shelf- an intelligent shelf that reports to the app regarding the inventory status. The shelf used Arduino as a microcontroller, and the app was written in Java.

Employment

Mechanical Developer Engineer

2021-2022

TESSA Dairy Machinery

Tessa Dairy Machinery manufactures, installs, and commissions complete dairy processing lines.

I lead engineering projects from the concept phase until production. My role was to design the product using Solidworks
