Yeshayahu 25 Tel-Aviv | aviadhahami@gmail.com | 972-54-4932840 | Birth: 30/07/1990
I.D. 302188347

EDUCATION

INTERDISCIPLINARY CENTER (IDC), ISRAEL

2013 - 2016

- Graduated a B/S.c in Computer Science and a minor in Business Management.
- Directed IDC Skillset meetup program. Skillset is a tech-meetup program, helping students discover and learn about languages and current topics from high-tech industry with hands-on experience.

WORK EXPERIENCE

WEB TECH LEAD | CY-OT, TEL-AVIV, ISRAEL

SEPTEMBER 2017 – TODAY

Web tech team leader (3-5 developers).

Incharge of web architecture and development (FE, BE, APIs, services, deployment etc.).

Migrated the old system from an old hard-coded AngularJS to a cutting-edge, scalable Vue2 application based on a Lerna monorepo.

FULL STACK DEVELOPER | GUESTY, TEL-AVIV, ISRAEL

SEPTEMBER 2016 – SEPTEMBER 2017

My role at Guesty was a fullstack developer and incharge of the FED.

My work included working with multiple APIs(Airbnb, Booking.com, Stripe and more) over multiple cloud interfaces(AWS - lambdas, EC2, Firebase, MongoDB Atlas and more).

Some of the features I've developed are:

1. Payments server - isolated EC2 machine over AWS that meets Stripe and Booking.com legal constraints.
2. Communication layer - A logical layer that allows an Angular application to communicate with the company's new React application such that they co-exist within the same page/DOM.

Was also incharge of technical interviews for new candidates, code style, GIT management and coding standards.

FULL STACK DEVELOPER | HEY-BAMBINI, TEL-AVIV, ISRAEL

JULY 2015 – DECEMBER 2015

- Developed cross-platform communication app using MEAN stack, Ionic and Cordova under Agile methodology.
- Constantly challenged with responsive design and high cross-platform performance requirements.

QA ENGINEER | CLICKTALE, RAMAT-GAN, ISRAEL

JULY 2014 – JULY 2015

SKILLS

Java, C#, Scheme.

JavaScript: Vanilla, Node, Express, VueJS, AngularJS, ReactJS, ReactNative.

JS Ecosystem: Webpack, Lerna, Storybook, Yarn, Jest.

DBs, Cache and Queues: Cassandra, Mongo, MySQL, Redis, Kafka.

Clouds: AWS, Firebase (and some of GCP), Heroku, DigitalOcean.

CI/CD: CircleCI, Jenkins, CodeShip, Docker(&hub).

Languages: Native Hebrew, fluent English.
