WORK EXPERIENCE

Full Stack developer, co-owner BlossomYou

11/2021 - Present

Family small business of handmade jewelry

Achievements/Tasks

- Developing a [custom e-commerce online store](#) for a line of hand-made jewelry designed by my wife
- FE: Angular 12, Angular Material
- BE: NodeJs(+Cloud Functions) on Firebase(GoogleCloud) infrastructure
- Implemented an Angular 12 front end app from scratch
- Implemented a fully functioning shopping cart feature
- Connecting [Meshulam API](#) via Node JS backend, for credit-card/Bit payments

Full Stack Angular/Java/Node developer Centimia

01/2019 - 10/2021

Achievements/Tasks

- Developed from scratch a production-ready Angular6 app with authentication, reactive forms, responsive UI, routing, and integration to Java back-end via HTTP service API.
- Developed and tested major features using Angular6 + NodeJS in the existing CRM [client application](#). Constantly adding new features and fixing existing bugs across the whole app.
- Maintaining a complex backend of our [FinTech CRM client](#) using Centimia Java framework (similar to Java Spring). Adding new features and fixing existing bugs on both backend (Java + Neo4j +SQL) and client (Java + ApacheWicket).
- Developed a Java REST API for downloading and manipulating financial XML data from a government URL.
- Developed the ChartWidget feature: a beautiful and easy-to-use Java utility for creating custom charts in ChartJS. By utilizing the java "builder" design pattern high usability and maintainability were achieved.

Software developer, freelancer MibergDev

07/2018 - 12/2018

Achievements/Tasks

- Built per spec & deployed a simple Android app to Google Play.
- Designed websites as per client specs (Elementor, WP).
- Collaborated with clients on a PHP-Angular project.
