PROFILE Knowledge and deep understanding of software development process based on .NET/C# technologies.

I consider myself as an enthusiastic, success-motivated developer with a lot of experience in any part of the development pipeline. Fast learner and committed to the quality of the product with “can do it” attitude.

SKILLS C# • .NET Core • Docker • ASP • Angular • WCF • REST • WebAPI • WPF • XAML • XUnit • T-SQL • OOP • SOLID • Design patterns • WiX installer • Documentation • Linux • Parallel/Multithreading • Profiling • Architecture • MS SQL Server

EXPERIENCE

Software Engineer, Sela.

2019

NCR: Support and development Point of Sale application. Improve, polish, bug fixing and develop new features in client-server .NET desktop application. Part of a small ninjas team that prepare and refactor existing code base toward containerization in Kubernetes on Google Cloud Platform.

Software Engineer, Ayehu Software LTD.

2018 - 2019

Full stack developer on automation style web application. Front-end build in Angular 4 and backend in .NET WebAPI/REST. Develop and implement detailed plans for distributed, asynchronous, multi-tenant system towards containerization on Azure cloud. Research and training team on 3rd party technologies that improve and simplify code development.

Software Engineer, Avaya Inc

2016-2018

Develop and improve existing code base towards high standards of code quality. Lean on S.O.L.I.D. principles wrapped with XUnit tests. Control and Response style application where front-end was built around ASP .NET and multi-threaded, multi-tenant backend. Half year as a project leader on mission to upgrade existing code to Angular 4 while providing accurate documentation and QA plans.

Software Engineer, Intel LTD

2015-2016

From scratch development of internal diagnostic application that standardize the way that Intel engineers communicate with product. Desktop application based on WPF technology that has to meet high standards of speed and effectiveness with near real-time responsiveness. Development of installer package based on WiX technology.

Software Engineer, Nice Systems

2013-2015

Develop, support and improve existing huge code base Monitor & Control style application . My job was research, develop and integrate new protocols and devices into existing system while providing design documentation and QA plans.

Software Engineer, WalleTex Microelectronics LTD.

2007-2013

From scratch development of internal applications that directly communicate with USB devices at low level. Interop/bridge communication develop as C++ with C# on top that directly calls Windows driver API

EDUCATION Bachelor of Science
Emek Israel College (2005-2007)

MILITARY SERVICE Fighter, Givati
1997-2000
