## Android Developer

### TECHNICAL EXPERIENCE

Mobile : **Native Android ( Kotlin, JAVA )**  
**Native iOS ( Swift and Objective C )**  
**Ionic, Cordova frameworks**

Web: **Angular 2, HTML5, CSS3, NodeJS, JQuery**  
**C#, ASP.NET, WSF development, JAVA**

DMBS: **Room, MS SQL, SQLite, MongoDB**

### PROFESSIONAL EXPERIENCE

**July 2018 - present Pangolin (Nuro Secured Messaging)**  
Android software developer (Kotlin, Java)

- Fully responsible for delivering the company's product, it's performance and quality.
- Developing scanner feature for the application, based on OpenCV libraries: image processing, shape recognition, document signature view.
- Integration with native Google components
- Developing core system and UI

**December 2017 - June 2018 Fourier education**  
Android software developer (native)

- Developing the enterprise application on Android native, that works with external and internal sensors.
- Developing SDK used by clients and within the company's products.
- The project simulates scientific process through interactive apps and data collection devices. [Einstein TM](#) helps teachers to provide a better experience while teaching science subjects in a classroom.

**August 2017 - December 2017 Independent projects**  
Angular 2.0 application development (Ionic, Cordova)  
Backend development (NodeJS, MongoDB, Firebase)  
Arduino (software and hardware)

- **Silencio**: an application measures the level of noise and produces virtual coins when the level of silence is below a certain level. When the "silence mode" duration lasts for one minute, the app sends a virtual coin to the server (Firebase). The Arduino based device indicates a level of noise/silence by getting updated from application via Bluetooth.
  - [Github](#) link for a mobile application part.
- **Clapp Members**: a virtual wallet for distributing coupons and sales' offers for clients.
  - [Github](#) link for a web part of the project.
  - [Dashboard](#) demo for distributors

## **April 2015 - August 2017      Nuro Secured Messaging**

Android / IOS software developer (native)  
Front-End developer (Coffescript, Javascript)

- Developed the core system functionality for enterprise-grade messaging platform for a private message exchange within organizations for Android and IOS apps ( multithreading, EventBus, retrofit, rxjava, SQLite, camera API, image editing, loaders, push notifications ) [Google Play link](#)
- Developed UI of the messaging web / desktop application (VOIP part, Service Workers, rxjs, 3rd part integrations)

## **2012 - 2015      Arkia Israel Airlines, Web Developer**

- Developed Front-End and Server functionality for the company websites and mobile app (Angularjs, JQuery, HTML5, CSS3, C#, .NET, SQL)
- Developed Search Engine for flights packages, online payment, order / user maintenance by clients
- Designed and developed mobile web-based application [m.arkia.co.il](http://m.arkia.co.il), including specs, planning, design, coding and integration
- Designed and built web-based back office system for companie's products and website's content.
- R&D of websites [arkia.co.il](http://arkia.co.il), [arkia.com](http://arkia.com), [airarkia.fr](http://airarkia.fr)

## **2008 – 2012      Prime Minister's Office, "Nativ" (as employee of Matrix Ltd.) .NET Programmer**

- Developed the Intranet distributed system, including server- and client-sides (WS, SSRS, page templates, WinForm apps )
- Developed the Internet site ( [www.il4u.org.il](http://www.il4u.org.il) ) ( WS, page templates, MS SQL queries / SPs / CLR )
- Design and development of HTML templates for newsletters and site pages.
- Prepared documentation for developed modules
- Tied integration with DB and support teams.

## **Independent projects**

### **2017 "ShowByDate London" service ( [Google Play](#) / [AppStore](#) )**

- Full life cycle of software development for Android and IOS apps
- Designed and developed Server Side & Database (Nodejs, MongoDB)
- Developed mobile application ( Angularjs, Ionic / Cordova )

### **2010 – 2014 Hinamis Project, HappyClick.ME**

- Designed and developed Server Side application (ASP.NET, MS SQL - queries/SPs )
- Developed Client Side UI (HTML, JQuery, Javascript )
- High-Level Design of business processes

## **EDUCATION, CERTIFICATIONS AND COURSES**

**2015**    Open University, Tel Aviv,  
Course: B.Sc in Math and Computer Science

**2011 – 2012**    John Bryce College, Tel Aviv,  
Course: Mobile development (Android and iPhone)  
JAVA, Android, PhoneGap (application for Android mobile devices as a course project)  
Objective C (application for an iPhone&IPad as a course project)  
HTML5, CSS3, JQuery, PHP, MySql (website as a course project)

**2006 – 2008**    John Bryce College, Tel Aviv,  
Course: Microsoft .NET Platform  
.Net, C#, ADO.NET, ASP.NET, Web Service, XML, SQL, HTML, CSS (relevant course projects)

**2001– 2003** State University, Odessa, Ukraine  
Studies for B.Sc. in computer sciences and mathematics  
C++, Pascal (State University courses)

## **LANGUAGES**

English, Russian (native language), Spanish, Hebrew, Italian (elementary proficiency), Ukrainian
